

**West Canada Valley Central School
Board of Education Goals
2023-24**

In order to promote life-long learning throughout our educational community, the West Canada Valley Central School District BOE will support and seek to improve:

1. Effective learning opportunities that increase student engagement, achievement, and completion of the District's educational program (our mission)
2. Support the development and maintenance of quality programs that support the interest and growth of faculty, staff, and community (professional development and community involvement)
3. Facilities and technologies which meet current needs, anticipate future needs and ensure safe and secure learning environments for all students, staff, and community (infrastructure and capital planning).
4. Comprehensive efforts to promote and provide district fiscal stability.
5. The establishment of consistent policies and procedures that promote common understanding and support increased student achievement.
6. Ongoing communication throughout the school and community.

Summary

Our goal is to provide the best education for our students while supporting the continued professional development of our faculty and staff in facilities that are safe and secure. We will accomplish this through clear and consistent policies; using fiscally prudent and responsible means. This will be discussed with the entire educational community in ongoing dialogue.
