

Five Themes of Geography

1. Location

Where a place can be found.

Absolute – exact (Latitude and Longitude)

Relative – general (I live in Newport)

2. Place

Identifies the natural and human features of a place.
(landforms, culture, language, religion, animals)

3. Human Environment Interaction

Relation between people and the environment.

How do people affect the environment?

How does the environment affect people?

4. Movement

How people, goods, and ideas move from one place to another.

5. Regions

Areas that share at least one common feature.

(political, climate, culture)
